Understanding Autism Spectrum Disorder

Individuals with ASD have complex and unique needs. Unfortunately, there is much misinformation about autism, so learning the facts about what the diagnosis entails and how it may affect each individual can assist you to maximize your effectiveness in arranging supports. Current research findings and diagnostic criteria will be explained in a clear and practical way along with general best-practice information on meeting these critical needs. Time will be devoted to discussing attendees’ various challenges.

Presented by: Stephanie Flamini, BCaBA, Autism New Jersey

Hosted by: Family Support Organization of Bergen County

Thursday, April 23, 2020
11am to 1pm

Family Support Organization of Bergen County
